CAUTIONARY STATEMENTS

This presentation contains statements or information concerning the business, operations and financial performance and condition of Wesdome Gold Mines Ltd. ("Wesdome" or the “Company”) which constitute forward-looking statements or information (collectively, “forward-looking statements”) within the meaning of applicable Canadian securities legislation. Forward-looking statements relate to future events or the anticipated performance the Company and reflect management’s expectations or beliefs regarding such future events and anticipated performance as of the date of this presentation. Forward-looking statements include, but are not limited to, statements with respect to the timing and amount of future production, costs of production, targeted cost reductions, capital expenditures, the success of exploration activities, permitting time lines, government regulation of mining operations, the future price of gold and other minerals, and the timing and issuance of permits. Generally, forward-looking information can be identified by the use of words such as “plans”, “expects”, “is expected”, “budget”, “scheduled”, “estimates”, “forecasts”, “intends”, “anticipates”, “believes” and variations of such words and phrases or statements that certain actions, events, or results “may”, “could”, “would”, “might”, or “will”, “occur” or “be achieved” or the negative connotation thereof. By their nature, forward-looking statements involve numerous assumptions, inherent risks and uncertainties, both general and specific, that contribute to the possibility that the predicted outcomes could differ materially from those contained in such statements. These risks and uncertainties include, but are not limited to, fluctuations in prices of commodities, fluctuations in currency markets, actual results of additional exploration and development activities at the Company’s projects, the timing and amount of estimated future production and the costs thereof, capital expenditures, the availability of any additional capital required to bring future projects into production, the failure of plant, equipment or processes to operate as anticipated, accidents, or labour disputes. Risks and uncertainties about Wesdome’s business are more fully discussed in the disclosure material filed with the securities regulatory authorities in Canada and available on SEDAR under the Company’s profile at www.sedar.com. Readers are urged to read these materials and should not place undue reliance on the forward-looking statements contained in this presentation. Wesdome assumes no obligation to update the forward-looking information relating to beliefs, opinions, projections, or other factors, should they change, except as required by applicable securities laws.

Estimates of Mineral Resources

This presentation contains information regarding the mineral resource estimate at the Company’s Kiena Mine Complex, which has been classified in accordance with the Canadian Institute of Mining, Metallurgy and Petroleum’s “CIM Definition Standards on Mineral Resources and Mineral Reserves” incorporated by reference into National Instrument 43-101 – Standards of Disclosure for Mineral Projects (“NI 43-101”). Mineral resources are not economic mineral reserves and the economic viability of resources that are not mineral reserves has not been demonstrated. The estimate of mineral resources may be materially affected by geology, environmental, permitting, legal, title, socio-political, marketing or other relevant issues. It is uncertain in all cases whether further exploration will result in upgrading the inferred mineral resources to an indicated or measured mineral resource category.

Qualified Person

The scientific and technical information in this presentation has been reviewed and approved by Michael Michaud, P. Geo and Vice President, Exploration of the Company, who is a “qualified person” within the meaning of NI 43-101.

**TIER 1 JURISDICTIONS**
- 100% owned assets in Canada
- Production base in Ontario
- Primary growth asset in Quebec

**HIGH GRADE GROWTH**
- Successfully discovering, developing and mining high grade deposits
- Eagle River average reserve grade of 14 g/t
- New discoveries continue to extend high grade mineralization

**LOW RISK PROFILE**
- Kiena represents fully-funded low capex re-start
- Assets located in prolific mining districts
- Debt free entity

**PROVEN MANAGEMENT**
- Track record of turning around challenged assets and creating significant value for shareholders
- Majority of management previously from St Andrews Goldfields (sold to Kirkland Lake in 2016)
