Corporate Overview – May 2021

Leading Yukon’s Modern Gold Rush
IMPORTANT NOTICE

This presentation includes certain statements that constitute “forward-looking statements”, and “forward-looking information” within the meaning of applicable Canadian and United Sates securities laws ("forward-looking statements" and “forward-looking information” are collectively referred to as “forward-looking statements”, unless otherwise noted). All statements, other than statements of historical fact, may be forward-looking statements. Forward-looking statements are often, but not always, identified by the use of words such as “believe”, “anticipate”, “estimate”, “project”, “intend”, “expect”, “may”, “will”, “plan”, “should”, “would”, “contemplate”, “possible”, “attempts”, “seeks”, “goals”, “targets” and similar expressions. These forward-looking statements appear in a number of places and include statements regarding our intent, or the beliefs or current expectations of our officers and directors. Forward-looking statements may relate to the Company’s future outlook and anticipated events or results and may include statements regarding the White Gold properties mentioned herein, including, but not limited to, exploration and development plans with respect thereto and exercise of the Option, other exploration and development activities, the Company’s future financial position, business strategy, budgets, litigation, projected costs, financial results, taxes, plans and objectives. We have based these forward-looking statements largely on our current expectations and projections about future events and financial trends affecting the financial condition of our business.

Forward-looking statements are based on certain estimates, expectations, analysis and opinions that management believed reasonable at the time they were made or in certain cases, on third party expert opinions. These forward-looking statements were derived utilizing numerous assumptions regarding expected growth, results of operations, performance and business prospects and opportunities, general business and economic conditions, interest rates, the supply and demand for, deliveries of, and the level and volatility of prices of gold and related products, regulatory and governmental approvals, market competition, accuracy of mineral resource and mineral reserve estimates and geological, operational and price assumptions on which such estimates are based, conditions in financial markets, future financial performance of the Company, our ability to attract and retain skilled staff, our ability to procure equipment and supplies and results of exploration and development activities. While the Company considers these assumptions to be reasonable, based on information currently available, they may prove to be incorrect. Accordingly, you are cautioned not to put undue reliance on these forward-looking statements. Forward-looking statements should not be read as a guarantee of future performance or results. To the extent any forward-looking statements constitute future-oriented financial information or financial outlooks, as those terms are defined under applicable Canadian securities laws, such statements are being provided to describe the current anticipated potential of the Company and readers are cautioned that these statements may not be appropriate for any other purpose, including investment decisions.

Such forward-looking statements involve known and unknown risks and uncertainties and other factors that may cause our actual events, results, performance or achievements to be materially different from any future events, results, performance or achievements expressed or implied by such forward-looking statements. Risks and uncertainties that may cause actual events, results, performance or achievements to vary materially include, but are not limited to, risks inherent to mineral exploration and development activities, changes in gold prices, changes in interest and currency exchange rates, inaccurate geological and metallurgical assumptions, unanticipated operational difficulties, government action or delays in the receipt of government approvals, adverse weather conditions, unanticipated events related to health, safety and environmental matters, labor disputes, political risk, social unrest, failure of counterparties to perform their contractual obligations, changes or further deterioration in general economic conditions, and other risks discussed in under the heading “Risks and Uncertainties” in the Company’s most recently filed MD&A.

Forward-looking statements speak only as of the date those statements are made. Except as required by applicable law, we assume no obligation to update or to publicly announce the results of any change to any forward-looking statement contained to reflect actual results, future events or developments, changes in assumptions or changes in other factors affecting the forward-looking statements. If we update any one or more forward-looking statements, no inference should be drawn that we will make additional updates with respect to those or other forward-looking statements. You should not place undue importance or reliance on forward-looking statements. All forward-looking statements contained in this presentation are expressly qualified in their entirety by this cautionary statement.

QUALIFIED PERSON

The scientific and technical information contained in this presentation has been reviewed and approved by Terry Brace, P.Geo. and Vice President of Exploration for the Company, who is a “qualified person” within the meaning of National Instrument 43-101 – Standards of Disclosure of Mineral Projects.
District Scale Land Package
- Large, highly prospective land package consisting of **over 420,000** hectares
- Favourable mining jurisdiction, site of the historic Klondike Gold Rush
- Adjacent to other recently discovered gold deposits, including Coffee (acquired by Goldcorp for $520M)

Unique Value Proposition
- Defined high-grade gold deposits:
  - **Golden Saddle/Arc**: 1,139,900 oz Au
    - Indicated & 402,100 oz Au Inferred
  - **VG**: 230,000 oz Au Inferred
- Recent exciting gold discoveries include, Ryan’s Surprise, Vertigo, Titan and Betty
- Extensive regional portfolio and exploration pipeline

Experienced Management
- Shawn Ryan – prospecting the Klondike district for the last 25 years, leading to the White & Coffee discoveries
- Terry Brace – 35 years of experience in mineral exploration and mine development
- PowerOne Group – 15+ years of experience in investing, financing and managing public natural resource companies

Strategic Partners
- Financial backing and technical expertise from:
  - Agnico Eagle
  - Kinross
  - Eric Sprott
- Strong capital markets relationships
**CAPITAL STRUCTURE**

Shares Outstanding: **131.9M**  |  Warrants: **0.7M**  |  Options: **8.1M**

2021 EXPLORATION PROGRAM – PRELIMINARY PLAN

Diamond drilling including targets on the Betty, Nolan, White Gold properties to test extents of mineralization

RAB drilling on select targets on JP Ross and others

Extensive regional exploration program including geological mapping & prospecting, soil sampling, GT Probe sampling, ground geophysics, LiDAR, and detailed structural interpretations

Updated NI 43-101 Compliant Resource Estimate & Supporting Technical Report on VG Deposit
Ryan’s Surprise Target

- Located 2km west of the Golden Saddle deposit

- Ryan’s Surprise target situated on a distinct 6km x 1km NW mineralized trend which hosts several additional prospective such as Ulli’s Ridge and Minneapolis Creek targets
RYAN’S SURPRISE TARGET

2020 Diamond Drilling Program
6 holes totalling 1,632.5m

Mineralization is structurally controlled in brittle fracture and breccia zones predominately in metaquartzite and shows a strong association with anomalous arsenic.

Mineralization encountered over a strike length of 250m by 130m and at a vertical depth of 300m and remains open in all directions.

Leading Yukon’s Modern Gold Rush
THE KLONDIKE GOLD RUSH (20Moz Placer)

Klondike Gold Rush (1896 – 1899)

Dredge No. 4 (1913 – 1959)
EXPLORATION APPROACH – UNIQUE TERRAIN

- While the rest of Canada was almost entirely covered by glacial ice during the last ice age, portions of the Yukon were ice-free – including the White Gold District

- Large ice-free region extended from central and northern Yukon across Alaska, and westward to northern Asia – forming a vast ice-free wilderness area where herds of grazing mammals and their predators (many now extinct) roamed

- An extensive thin (generally ≤ 2-3m) veneer of overburden is characteristic, directly impacting exploration approach:
  - Strong initial focus on soil geochemistry surveys (400,000+ samples in company database) – finding the haystacks...
  - Successful utilization of GT Probe (soil-bedrock interface sampling) and low-cost Rotary Air Blast (RAB) drilling to better screen and define surface targets before diamond drilling
  - Conventional geological, geochemical and geophysical exploration techniques
RESOURCE GATEWAY PROJECT

- Joint funding project between the federal and territorial governments and industry designed to make necessary upgrades to existing road infrastructure and provide more reliable access into areas of high mineral potential

- Total contributions for the entire project = $468,845,000: Federal Government up to $248 million; Yukon Government up to $112 million; Industry up to $109 million

- Project includes a haul road connecting the Coffee project with Dawson City, which passes directly through the heart of WGO’S land package
The Project:

- First discovery in the White Gold District
- Located 95 km south of Dawson City, Yukon
- Airstrip, barge access, and a fully operational exploration camp
- Mineralization known to extend beyond the limits of the current resource
- Excellent untested exploration potential in surrounding area
