

WORLD-CLASS GOLD MINE IN TIER ONE JURISDICTION

TSX-V: SGI | OCTMKTS: SUPGF

Very Independent Research Presentation
February 16, 2022

DISCLAIMERS

All figures in US\$ unless otherwise noted

Forward Looking Statements:

The reader is advised that the Plutonic Main Pit Preliminary Economic Assessment ("PEA") referred to in this presentation is preliminary in nature, includes Inferred Mineral Resources that are considered too speculative geologically to have the economic considerations applied to them that would enable them to be categorized as Mineral Reserves, and there is no certainty that the PEA will be realized. Mineral Resources that are not Mineral Reserves do not have demonstrated economic viability. There are no Mineral Reserves contained in the PEA.

Certain statements made in this presentation contain forward-looking information, within the meaning of applicable Canadian securities legislation, and forward looking statements, within the meaning of applicable United States securities legislation (collectively, "forward-looking information"), which reflects management's expectations regarding Superior Gold's future growth, results from operations (including, without limitation, future production and capital expenditures), performance (both operational and financial) and business prospects and opportunities.

Wherever possible, words such as "predicts", "projects", "targets", "plans", "expects", "does not expect", "budget", "scheduled", "estimates", "forecasts", "anticipate" or "does not anticipate", "believe", "intend" and similar expressions or statements that certain actions, events or results "may", "could", "would", "might" or "will" be taken, occur or be achieved, or the negative or grammatical variation thereof or other variations thereof, or comparable terminology have been used to identify forward-looking information. Such forward-looking information includes, without limitation, statements with respect to Mineral Reserve and Mineral Resource estimates; targeting additional Mineral Resources and expansion of deposits; Superior Gold's dependency on the Plutonic Gold Operations for operating revenue and cash flows in the near term; the Corporation's expectations, strategies and plans for the Plutonic Gold Operations, including the Corporation's planned exploration, development and production activities at the Plutonic Gold Mine, Hermes and Bryah Basin; and future financial or operating performance and condition of the Corporation and its business, operations and properties.

Forward-looking information is not a guarantee of future performance and is based upon a number of estimates and assumptions of management, in light of management's experience and perception of trends, current conditions and expected developments, as well as other factors that management believes to be relevant and reasonable in the circumstances. While the Corporation considers these assumptions to be reasonable, the assumptions are inherently subject to significant business, social, economic, political, regulatory, competitive and other risks, uncertainties, contingencies and other factors that could cause actual actions, events, conditions, results, performance or achievements to be materially different from those projected in the forward-looking information. Many assumptions are based on factors and events that are not within the control of the Corporation and there is no assurance they will prove to be correct.

Furthermore, such forward-looking information involves a variety of known and unknown risks, uncertainties and other factors which may cause the actual plans, intentions, activities, results, performance or achievements of the Corporation to be materially different from any future plans, intentions, activities, results, performance or achievements expressed or implied by such forward-looking information. See "Risks and Uncertainties" in the Corporation's current Annual Information Form and most recent Management's Discussion and Analysis for a discussion of these risks, both filed on SEDAR at www.sedar.com. In addition, the Corporation is exposed to outbreaks or threats of outbreaks of viruses, other infectious diseases or other similar health threats, including the novel coronavirus ("COVID-19") outbreak, which could have a material adverse effect on the Corporation by causing operational and supply chain delays and disruptions, labour shortages, shutdowns, inflationary pressures on operating or capital costs, the inability to sell gold, capital markets volatility or other unknown but potentially significant impacts. The Corporation cannot accurately predict what effects these conditions will have on the Plutonic Gold Operations or the financial results of the Corporation, including uncertainties relating to travel restrictions to the Plutonic Gold Operations or otherwise and business closures that have been or may be imposed by governments. If an outbreak or threat of an outbreak of a virus or other infectious disease or other public health emergency occurs, it could have a material adverse effect on the Corporation's business, financial condition and results of operations.

The Corporation cautions that the foregoing lists of important assumptions and risks, uncertainties and other factors are not exhaustive. Other events or circumstances could cause actual results to differ materially from those estimated or projected and expressed in, or implied by, the forward-looking information contained herein. There can be no assurance that forward-looking information will prove to be accurate, as actual results and future events could differ materially from those anticipated in such information. Accordingly, readers should not place undue reliance on forward-looking information as no assurance can be given that any of the events anticipated by the forward-looking information will transpire or occur, and if any of them do so, what benefits the Corporation will derive therefrom. In addition, please note that statements relating to "Mineral Reserves" or "Mineral Resources" are deemed to be forward-looking information as they involve the implied assessment, based on certain estimates and assumptions that the Mineral Reserves and Mineral Resources described can be profitably mined in the future.

This presentation does not constitute an offer to sell or the solicitation of an offer to buy any securities of Superior Gold and any representation to the contrary would be unlawful.

Market and Industry Data:

Unless otherwise indicated, the market and industry data contained in this presentation is based upon information from independent industry publications, market research, analyst reports and surveys and other publicly available sources. Although the Corporation believes these sources to be generally reliable, market data is subject to interpretation and cannot be verified with complete certainty due to limits on the availability and reliability of raw data, the voluntary nature of the data gathering process and other limitations and uncertainties inherent in any survey. The Corporation has not independently verified any of the data from third party sources referred to in this presentation and accordingly, the accuracy and completeness of such data is not guaranteed.

Use of Non-IFRS Financial Measures:

This presentation refers to "all-in sustaining costs per gold ounce" and "total cash costs per gold ounce" because certain readers may use this information to assess the Corporation's performance and also to determine the Corporation's ability to generate cash flow. This data is furnished to provide additional information and are non-IFRS measures and do not have any standardized meaning prescribed by IFRS. All-in sustaining costs per gold ounce and total cash costs per gold ounce should not be considered in isolation as a substitute for measures of performance prepared in accordance with IFRS and are not necessarily indicative of operating costs presented under IFRS.

WORLD-CLASS GOLD MINE

Canadian based
TSX-V listed gold
producer

Owens 100% of the
Plutonic Gold
Operations

Located in
world-class
Western Australian
goldfields

Continuous
production since
1990

Historical
production of
~6moz

INVESTMENT HIGHLIGHTS

One of the world's top mining jurisdictions¹

World-class gold mine and established infrastructure

Clear optimization and expansion plan

Significant Mineral Resource with exploration upside

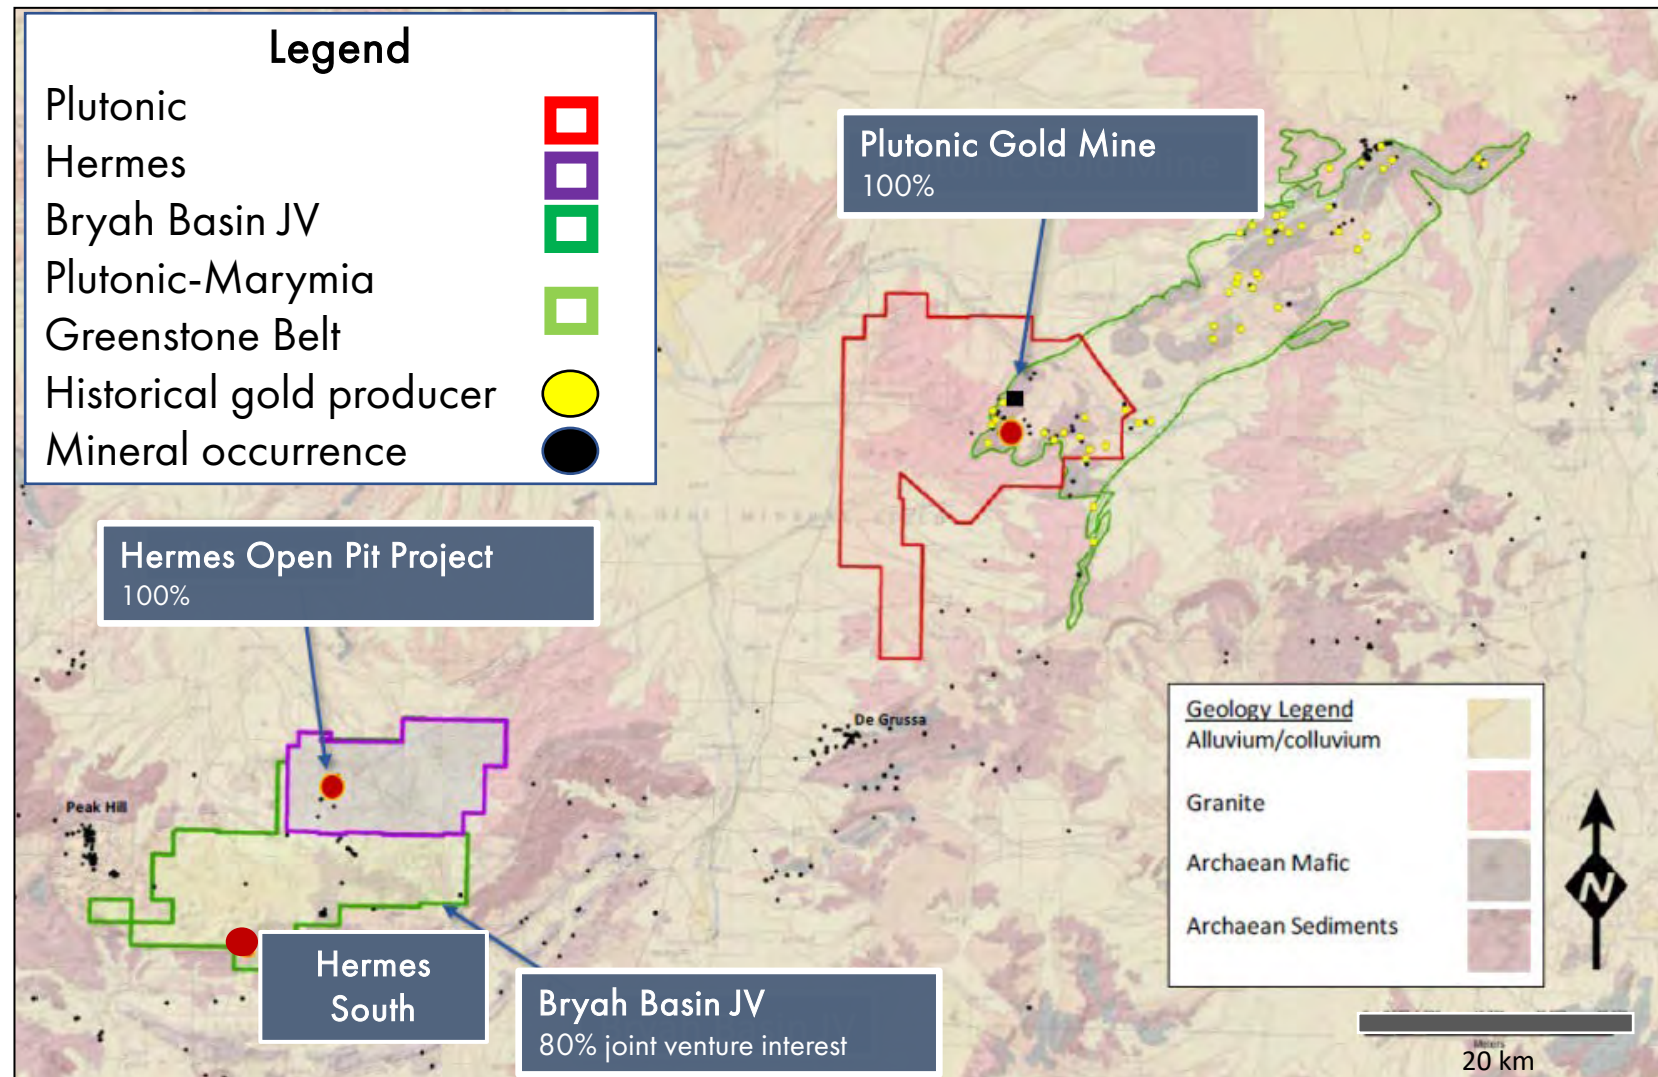

Compelling re-rate opportunity

1. Fraser Institute's 2020 annual survey

PLUTONIC GOLD OPERATIONS

644 km² property | Fly in/fly out operation

OUTSTANDING INFRASTRUCTURE

Plutonic Underground and Open Pit mines

WELL DEFINED GROWTH STRATEGY

Low-cost organic growth options

Four pillars to enable the growth strategy

Plutonic Underground

1

Steady state production of 70-85koz/yr

Goal 1

Safe, reliable and stable operations

+ Open Pits

2

Increase production to ~100koz/yr

Goal 2

Operations of scale

+ Second Mill

3

Increase production to >150koz/yr

+ New Discovery

4

Return to mid-tier producer status

Goal 3

Smart exploration

SAFETY, SUSTAINABILITY & DIVERSITY

Committed to mining safely, responsibly and developing a diverse workforce

Safety

- Safety** of our people is our top priority
- Continue transformational shift to a committed safety culture of no accidents
- Successfully operated through COVID-19 pandemic
- Developed Infectious Disease Management Plan

Environmental

- Committed** to respecting, protecting and supporting biodiversity and the natural environments in which we work
- Reducing energy and water consumption, limiting waste production, minimizing land disturbance, preventing pollution on sites
- Closure and rehabilitation of sites are carried out to levels established through our EMS system

Governance/Social

- Committed** to the highest standards of corporate governance through corporate social responsibility, ethics and integrity
- Committed to long lasting benefits to all our stakeholders
- Working with and developing transparent relationships with local groups

Diversity

- Committed** to developing a talented and diverse workforce representing the wide range of cultures in our community
- Establish and meet targets for greater diversity
- Create proactive initiatives to support and encourage employment opportunities for indigenous people and women

2022 GUIDANCE

	Low	High
Production (oz of Gold)	80,000	90,000
Cash Costs (\$/oz) ^{1,2}	\$1,300	\$1,450
All In Sustaining Costs (\$/oz) ^{1,2}	\$1,450	\$1,600
Exploration Expenditures (\$M) ^{1,3}	\$7.0 – 10.0	
Sustaining Capital Expenditures (\$M) ¹	\$6.0 – 8.0	
Non-Sustaining Capital Expenditures (\$M) ^{1,4}	\$8.0 – 10.0	

¹ Assumes an AU\$:US\$ exchange rate of 0.75:1

² This is a Non-IFRS measure. Refer to Non-IFRS measures section of the Company's MD&A's for a description of these measures

³ Exploration expenditures could increase with positive exploration results

⁴ Non-sustaining capital expenditures are primarily related to underground capitalized development for new mining fronts, pre-production capital for Main Pit Deeps and other site upgrades.

UNDERGROUND OPTIMIZATION

Unlocking value through production growth, margin optimization and systematic exploration

Exploration & Resource Extension

- Additional third underground rig added in Q4'20
- Implementing new and existing mining fronts
- Planning and executing exploration program in Indian Zone and Western Mining Front
- Infill drilling to increase resource confidence → Improves prediction in production stopes
- Surface drilling targets planned and commenced on SGI properties

Margin Optimization

- Revitalized UG Fleet (two loaders, two trucks) → Increase reliability, improve productivity, and lower UG maintenance costs
- Underground mining optimization studies
- Gravity circuit commissioned**
- Commenced fine grinding study
- Increase milling rate

Improving Grade

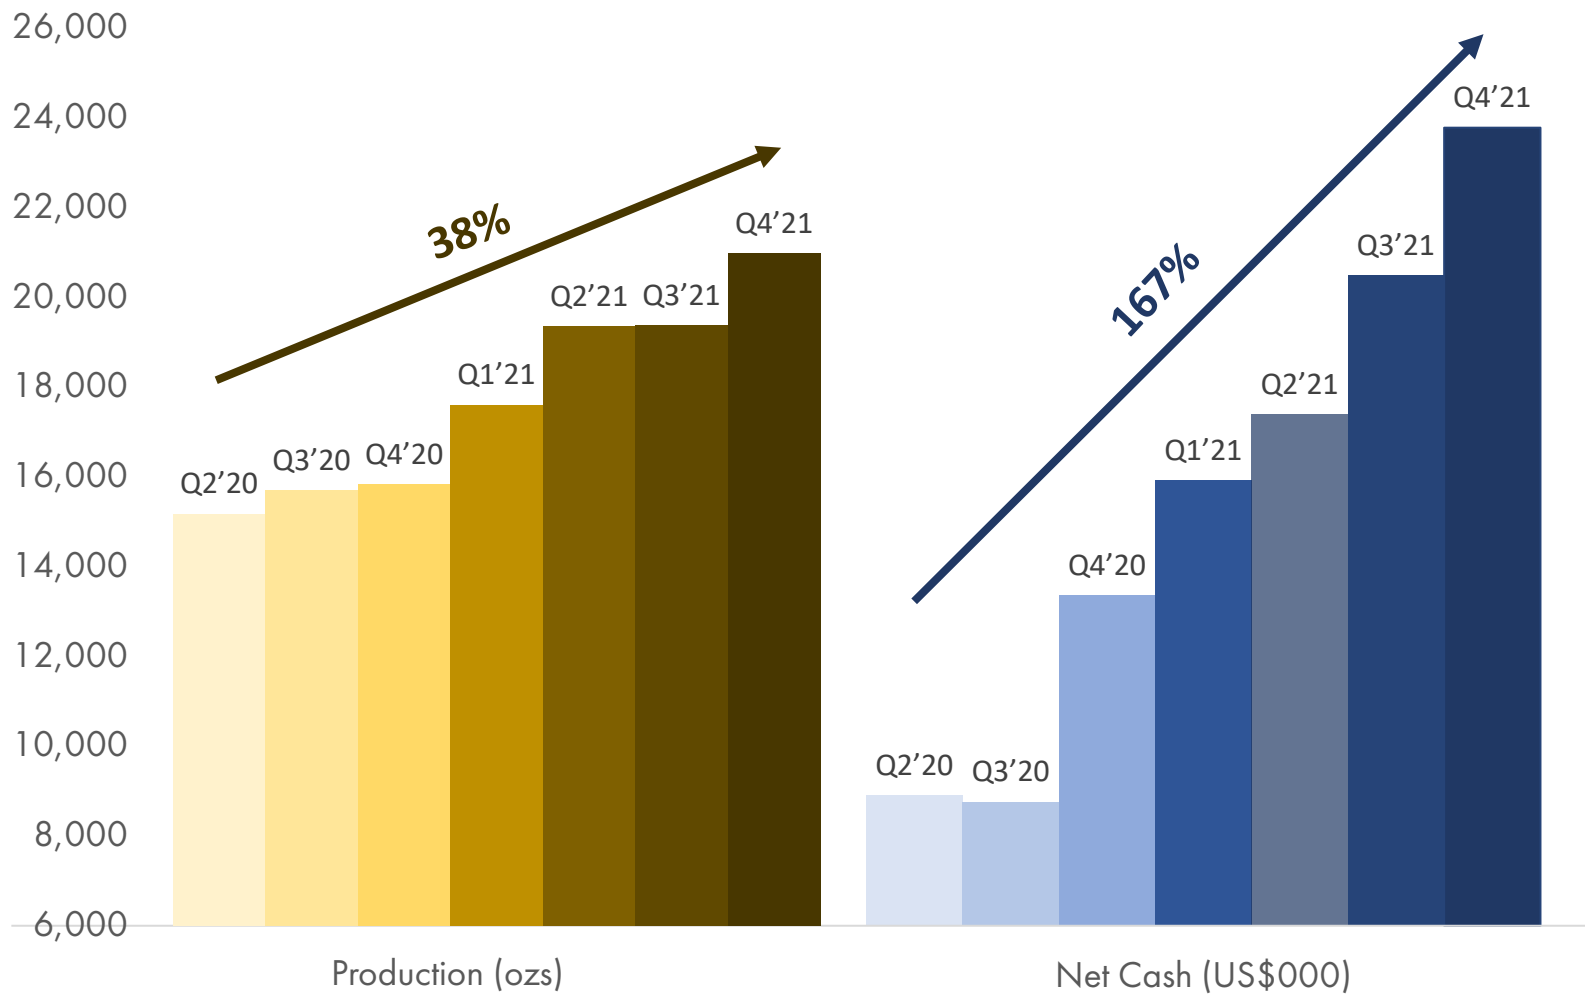

- Targeting stope grade average >3.0g/t and sustain it
- Improving geological interpretation and modelling
- Increasing grade control drilling
- Implementing repeatable and high quality mine design, planning and scheduling
- Implementing steps to provide consistent reconciliation against reserve model

Economic Studies

- Completed PEA assessment of Main Pit Push-Back and progressing early entry options
- Advancing Open Pit Plan → Open pit feed commenced in Q2'21**
- Updating the LOM Underground Plan
- Maximize profitable open pit ore supply through redesign of pits, sequencing

IMPROVING PRODUCTION AND FINANCIAL POSITION

Highlights – past seven quarters, ending December 31, 2021

Quarterly Production

↑ **32%**

Stope Grade

↑ **30%**

Net Cash

↑ **167%**

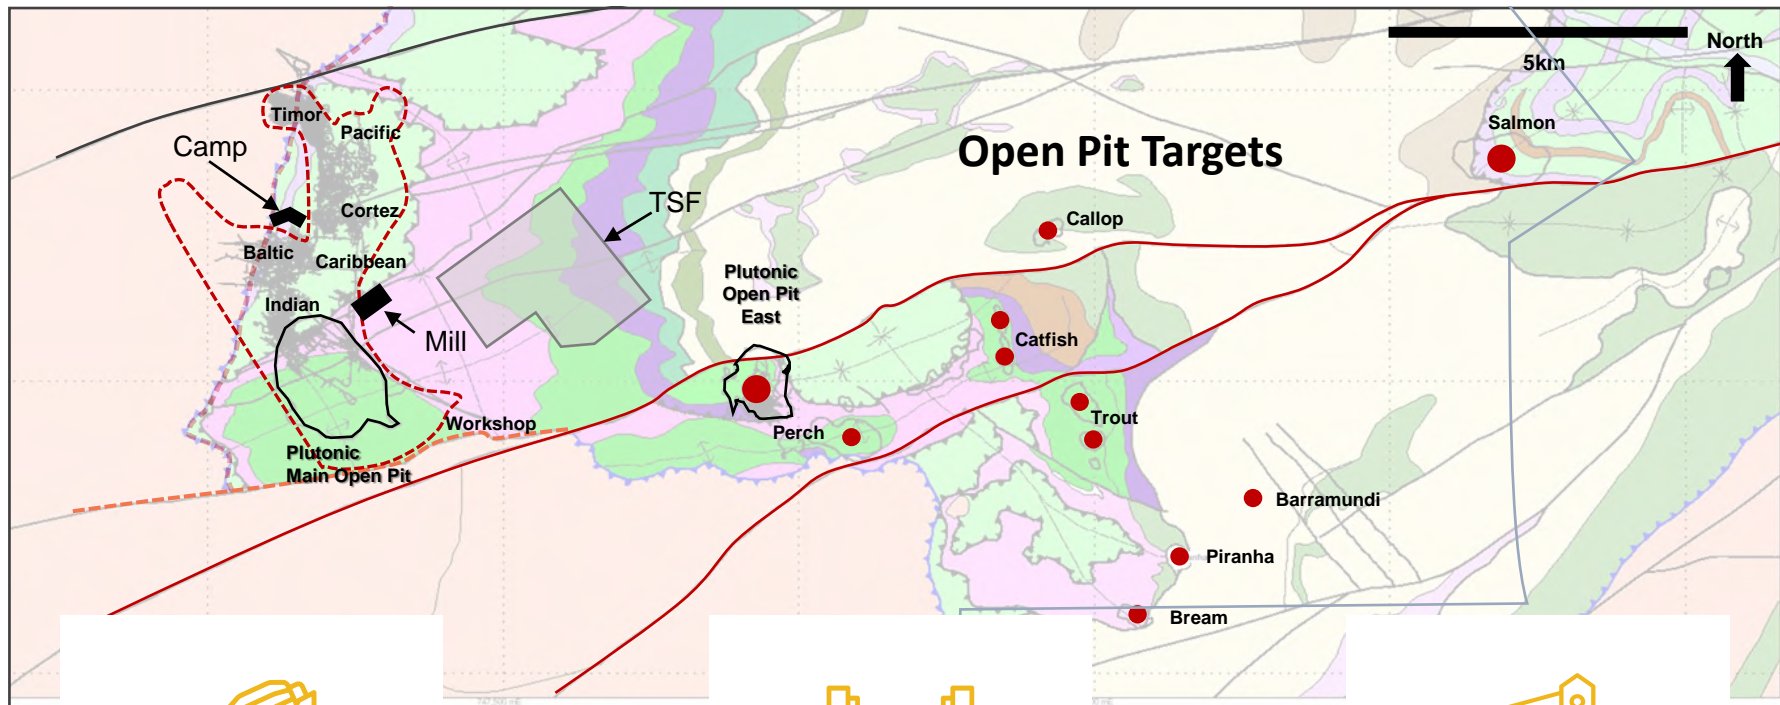

At June 30/21 no term debt outstanding

Note 1: Refer to Superior Gold's Financial Statements and Management, Discussion, and Analysis.

Note 2: Net Cash is calculated as cash minus gold loan amount outstanding.

OPEN PITS TO PROPEL PRODUCTION TO 100,000 OZ/YR

Past producing pits close to mill with minimum haulage

Plutonic Main Pit, Plutonic East, Perch, Salmon, Hermes, and Hermes South

900,000 tonnes per year in available capacity at mill

PLUTONIC MAIN PIT PUSH-BACK^{1,2,3}

Preliminary Economic Assessment highlights

A\$120 million

NPV 5% post-tax

35% IRR

At \$1,505 per ounce gold

A\$82 million

Low capital intensity

60,000oz

Avg production over six years

357,000oz

LOM production at 2.1g/t

\$863/oz

Low AISC

1.9
Moz

M&I Resources

16.3Mt at 3.6g/t gold

3.1
Moz

Inferred Resources

30.6Mt at 3.1g/t gold

Technically simple

Utilize existing infrastructure

Notes:

1) Refer to December 2, 2020 Press Release for additional details. Measured and Indicated Resources are for the overall Plutonic Gold operations (inclusive of open pit and underground);

2) Inferred Resources are for the overall Plutonic Gold operations (inclusive of open pit and underground); and

3) LOM production excludes pre-production ounces of 10Koz.

LOW-COST EXPANSION POTENTIAL

Opportunities to restart second mill

- Conventional 1.8Mtpa CIL mill → 0.9 Mtpa available after underground contribution
- Significantly higher production leveraged to improved grades
- Second mill currently on care and maintenance with 1.2Mtpa capacity
- Minimal capex to restart second mill

Head Grade (g/t Au)	Production using One Mill (oz)	Production using Two Mills (oz)
2.0	98,000	153,000
2.5	123,000	191,000
3.0	148,000	230,000

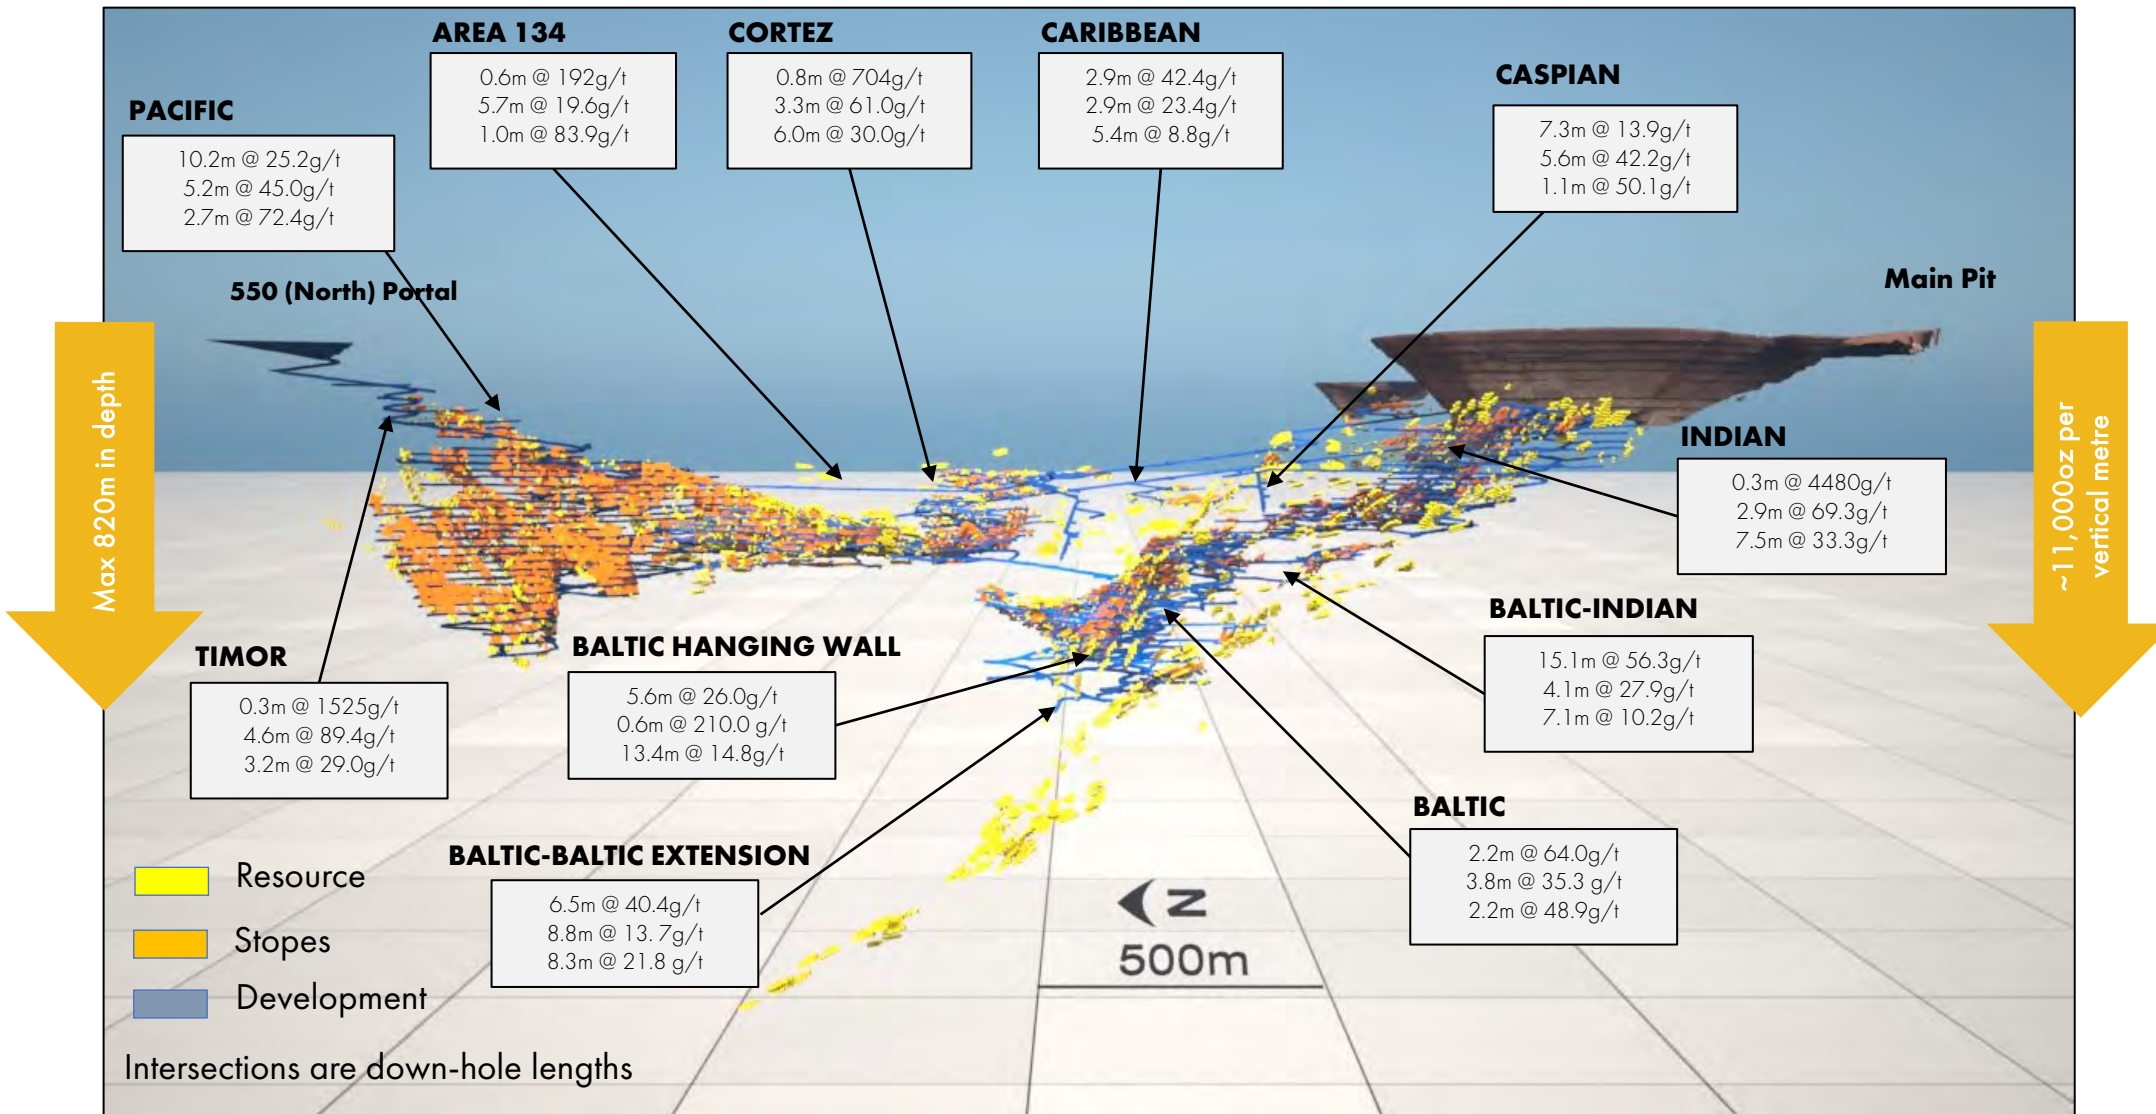

Note: Based on blended grade from underground and open pit and assuming recoveries of 85%

SIGNIFICANT EXPLORATION UPSIDE ACROSS PLUTONIC

Highlights of infill and expansion drilling at Plutonic since acquisition

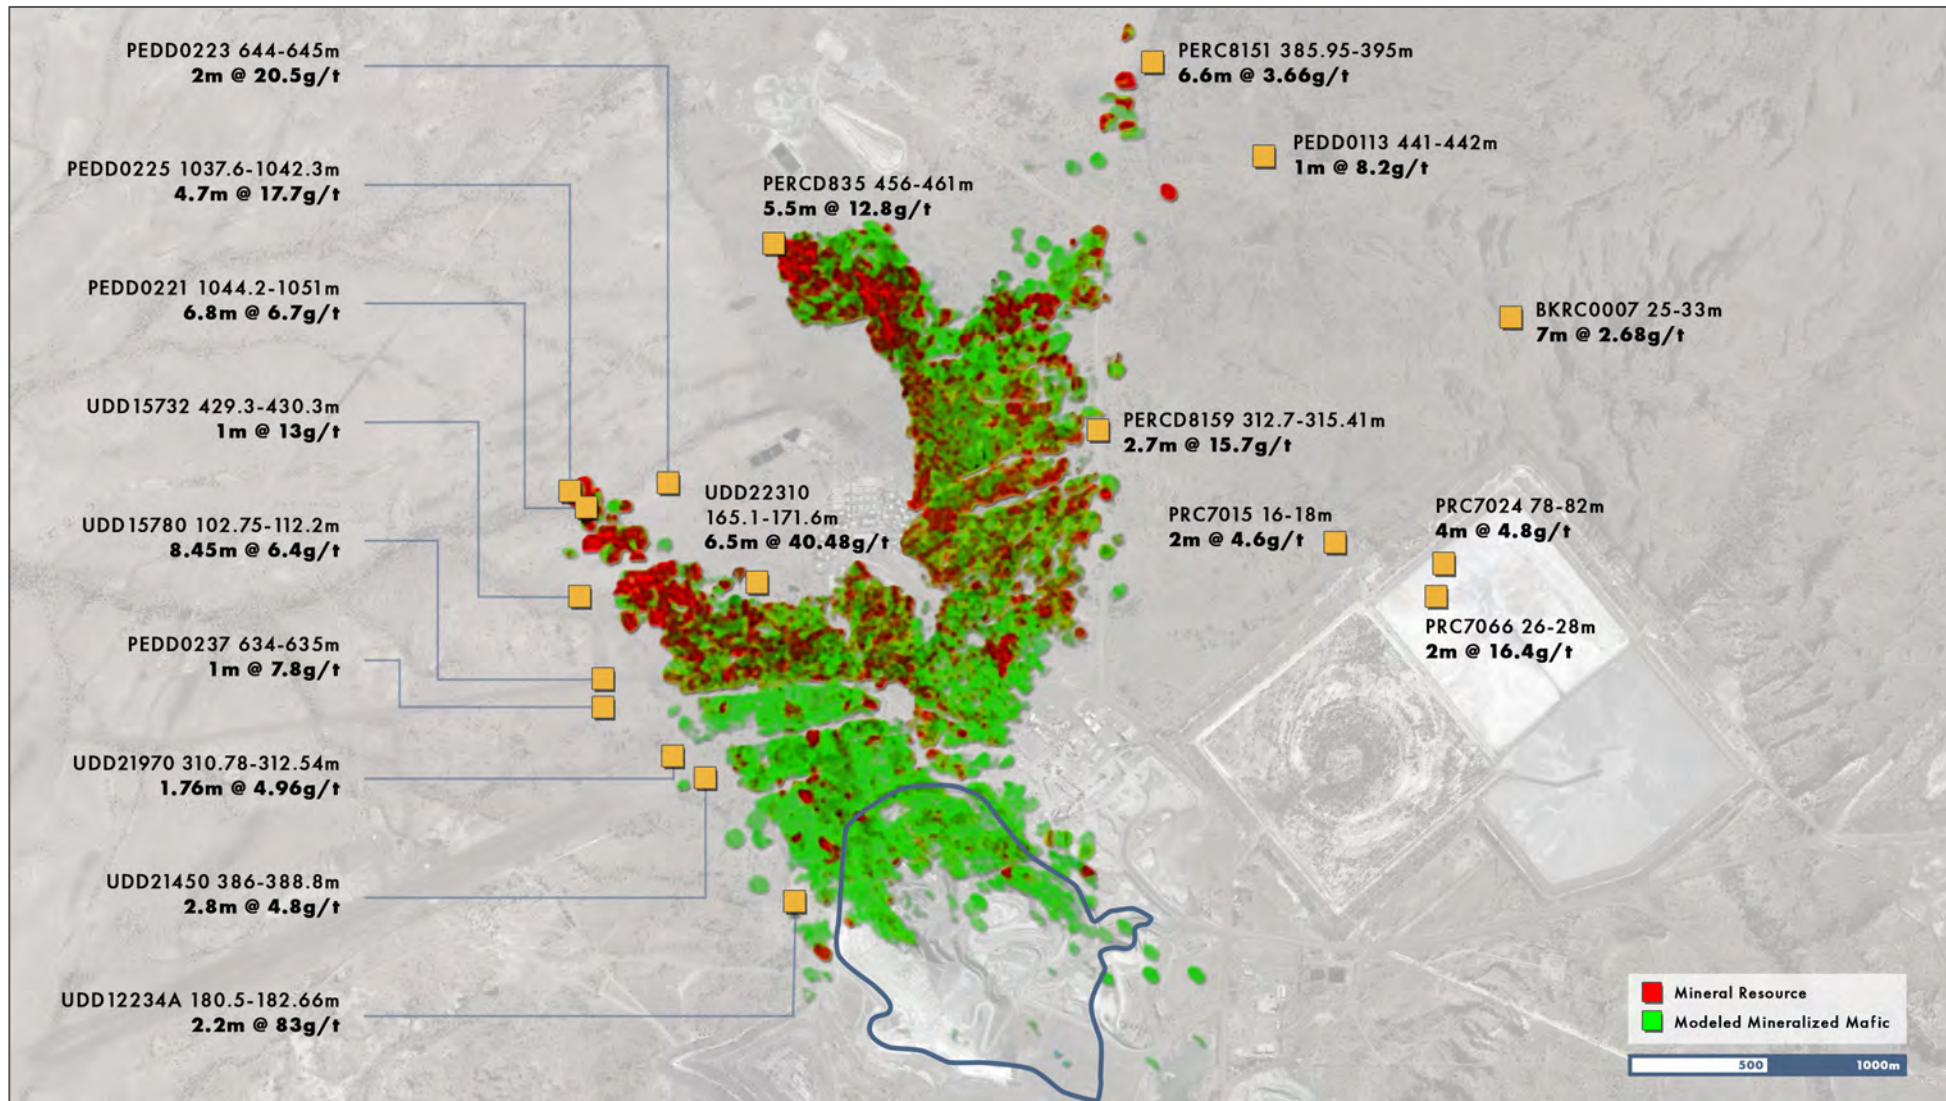

Note: For details, please refer to the press releases dated May 11, 2017, August 2, 2017, August 31, 2017, September 25, 2017, January 17, 2018, March 15, 2018, May 3, 2018, July 30, 2018, November 19, 2018, December 10, 2019, February 10, 2020, June 17, 2020, June 24, 2020, March 1, 2021, March 29, 2021, and June 23, 2021 available on the Company's website and sedar.com

HISTORIC STEP OUT DRILLING

Ore grade intersections >1 km outside of mineralized mafic

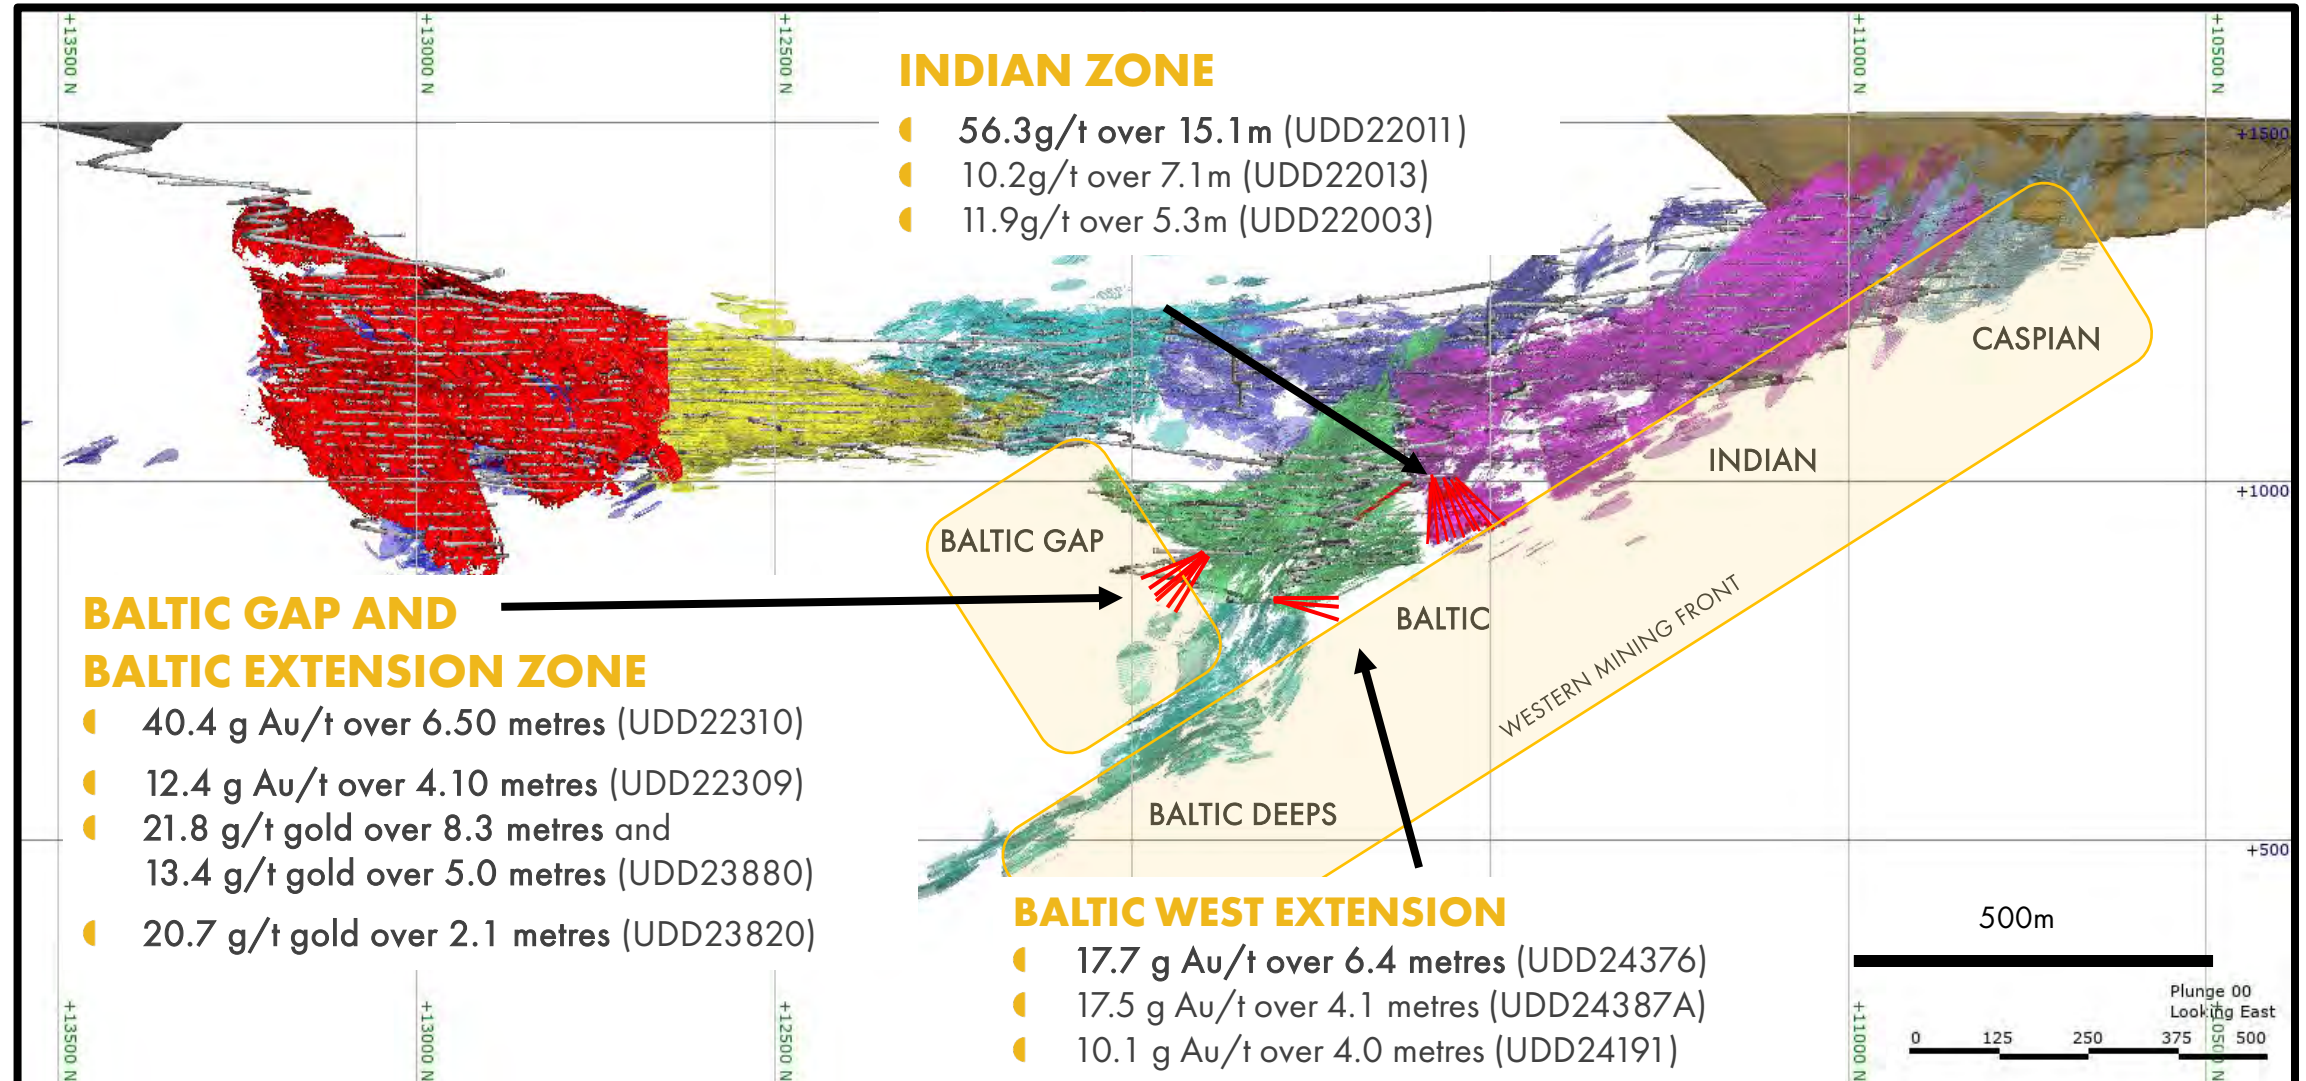

Source: Historical drilling, including as completed by previous operators.

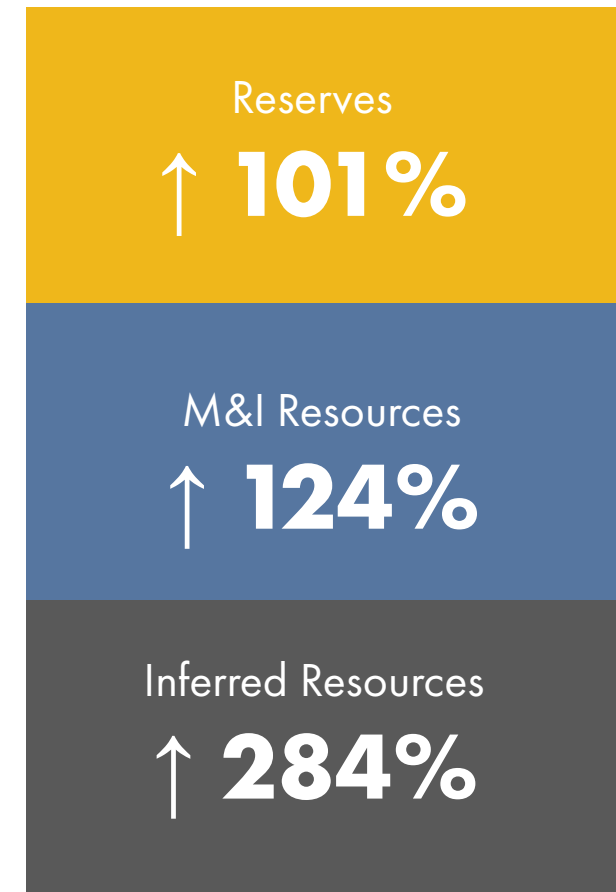

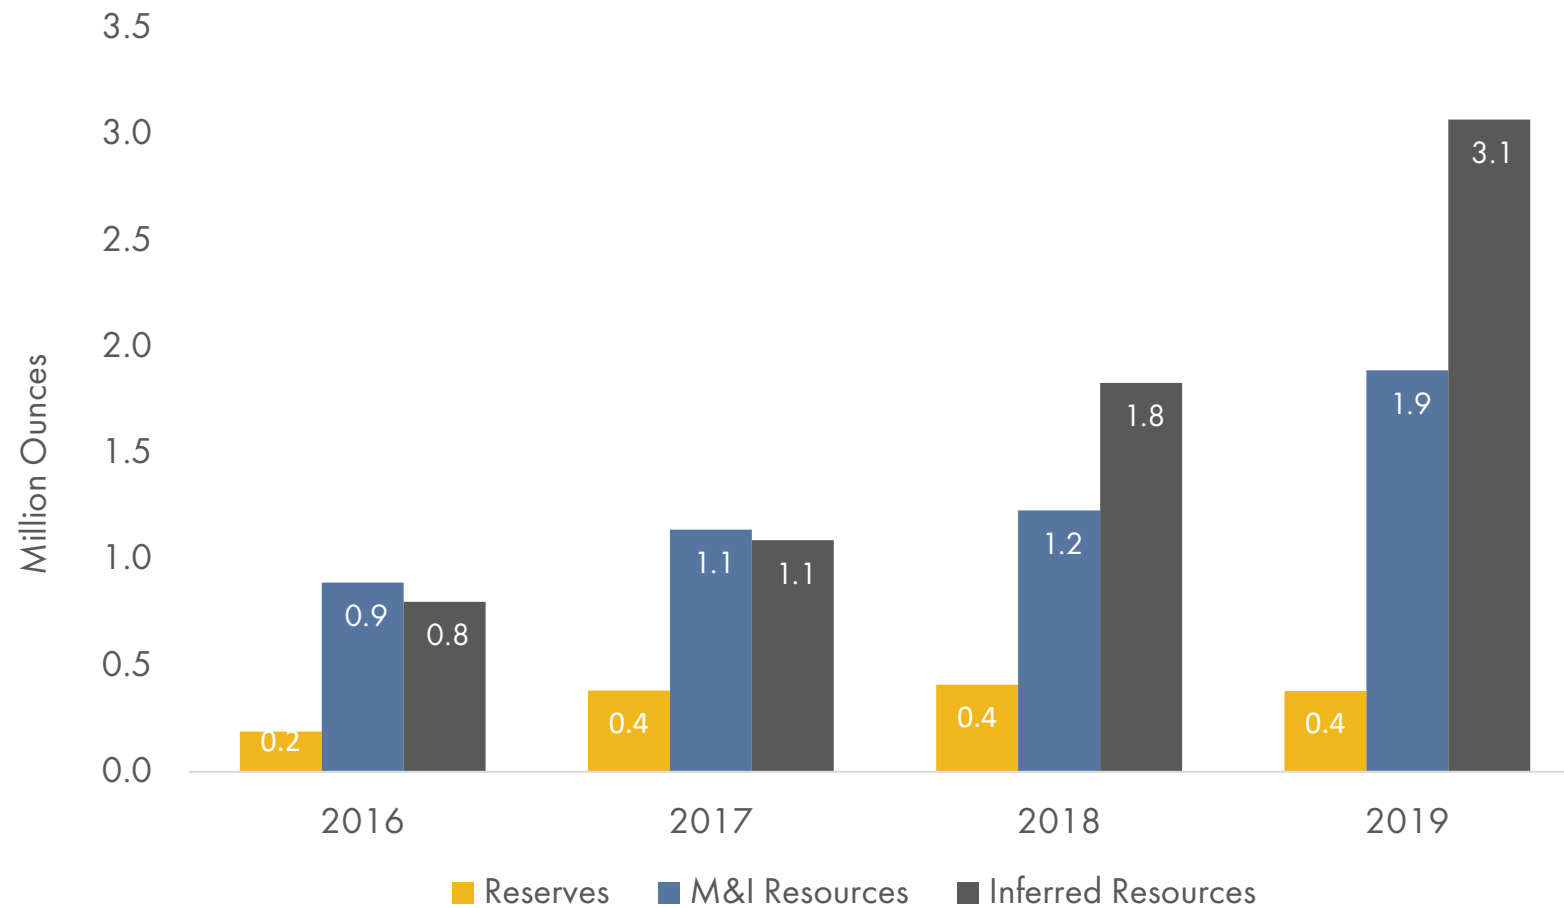

COMPREHENSIVE EXPLORATION PROGRAM DELIVERING RESULTS

Selective drill results Q2 2020 to Q2 2021

INCREASING RESERVES AND RESOURCES

Growth through the drill bit – Update to Reserves and Resources expected in H1 '22 following technical assessment

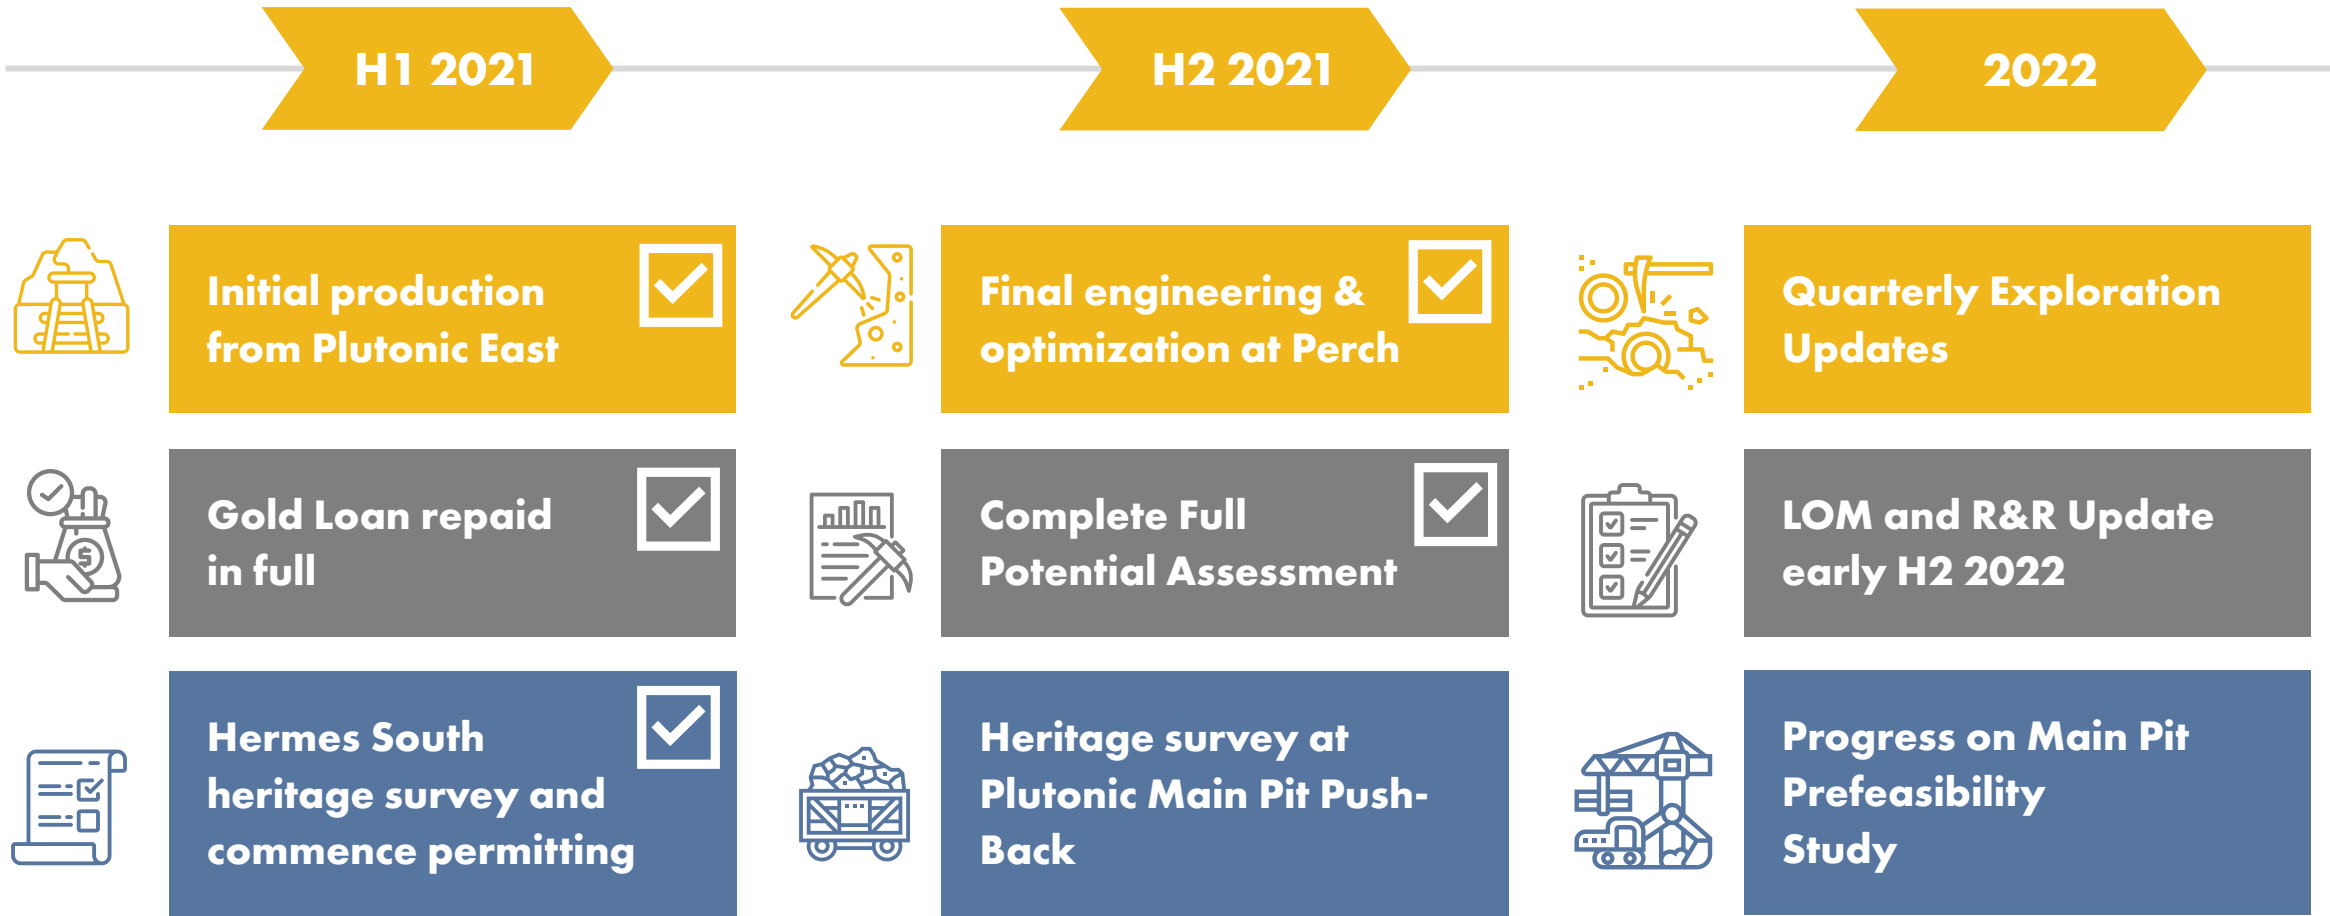

Note 1: For details on the Company's Reserves and Resources, please refer to the press release dated December 2, 2020, available on the Company's website and sedar.com

Note 2: Measured and Indicated (M&I) Resources are inclusive of Proven and Probable (P&P) Reserves

Note 3: Updated Reserves and Resources expected in H1 '22 following technical assessment

UPCOMING CATALYSTS

APPENDICES

MANAGEMENT

Chris Jordaan

PRESIDENT AND CHIEF EXECUTIVE OFFICER

- 30 years international processing and mining industry experience
- Extensive career operating underground and open-pit mines and leading business transformation across Australia
- Formerly with Newcrest Mining, International Ferro Metals Limited

Paul Olmsted

CHIEF FINANCIAL OFFICER

- Appointed CFO in Jan. 2017
- Former SVP Corporate Development, IAMGOLD
- Formerly with Repadre Capital, Scotiabank Corporate Lending

Russell Cole

GENERAL MANAGER PLUTONIC & VICE PRESIDENT OPERATIONS

- Appointed GM & VP in Aug. 2021
- 30+ years experience in gold, nickel, tin, coal
- 20 years senior leadership roles, including Newcrest

Mike McAllister

VICE PRESIDENT INVESTOR RELATIONS

- Appointed VP IR in January 2022
- 18 years of experience with public mining companies, 11 years specialized in investor relations and corporate development
- Formerly with Sierra Metals Inc, Avion Gold and BMO Capital Markets

BOARD OF DIRECTORS

Mark Wellings

CHAIRMAN OF THE BOARD

- Mining professional with over 25 years experience in exploration, development and production
- Joined GMP Securities L.P. in 1996 where he spent 18 years and co-founded the firm's corporate finance mining practice

Tamara Brown

DIRECTOR

- 25+ years international mining industry experience
- Director since 2017
- Formerly with Newcrest Mining, Primero Mining, IAMGOLD
- Former professional engineer and Investment Banking partner

Chris Jordaan

DIRECTOR

- 30 years international processing and mining industry experience
- Extensive career operating underground and open-pit mines and leading business transformation across Australia
- Formerly with Newcrest Mining, International Ferro Metals Limited

René Marion

DIRECTOR

- 30+ years of experience in the Mining Industry in both technical and management roles
- Former Chairman, Guyana Goldfields and Richmond Mines
- Former President, CEO and Director of AuRico Gold

Damien Marantelli

DIRECTOR

- 40 years of international mining experience
- Previously, CEO of Metals X and COO of Primero
- Senior management roles with First Quantum, Inmet Mining, BHP Billiton
- Based in Western Australia

SAFETY OF OUR PEOPLE IS OUR TOP PRIORITY

- Continue transformational shift to a committed safety culture of no accidents
- Conducted Safety Engagement Workshops site wide
- Introduced S.L.A.M. (Stop, Look, Assess, Manage) hazard identification, control and elimination across site
- Introduced 'Felt' Leadership Scorecard – Leading indicator of safety: audit, inspect, measure, coach

- Successfully operated through COVID-19 pandemic
- Developed Infectious Disease Management Plan
- Pre-flight screening protocols
- Self-isolation mandatory following international travel
- Site isolation facilities for anyone showing symptoms

AUSTRALIAN GOLD PRICE AT RECORD HIGHS

Source: Bloomberg; Note: Data as at October 29, 2021

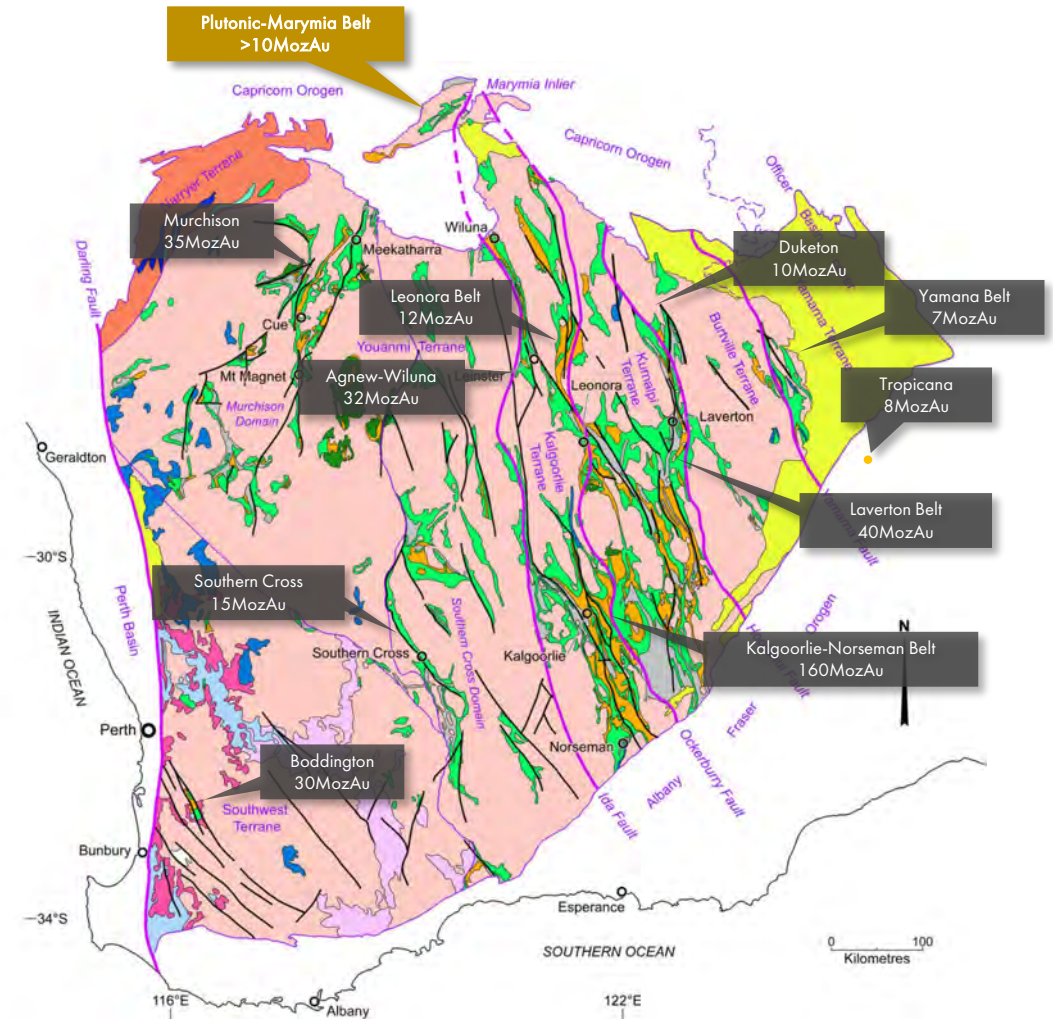

WORLD-CLASS YILGARN GOLD CAMP

More than 123 million ounces of historic production

- Western Australia – one of the world’s top ranked regions for mining investment¹
- Plutonic – one of the “Big 5” world-class Yilgarn gold discoveries of the 90’s → all mines still producing 30 years after discovery²
- Plutonic – Marymia Belt forms one of the major gold camps of Western Australia

Mine	Commenced Production	Production Period	Annual Production (oz Au)	Estimated Total Production (oz Au)
Kalgoorlie Golden Mile	1893	127	632,000	55,000,000
Boddington	1987	33	794,000	8,000,000
Telfer	1977	43	462,000	7,000,000
Jundee	1995	25	210,000	7,000,000
St Ives	2000	20	372,000	7,000,000
Norseman (to 2013)	1935	82	24,000	6,000,000
Plutonic	1990	30	90,000	6,000,000
Sunrise Dam	1998	22	214,000	6,000,000
Kanowna Belle	1993	27	96,000	6,000,000
Granny Smith	1996	24	301,000	5,000,000

ASSETS PURCHASED FOR CENTS ON THE DOLLAR

Replacement value of assets > \$2.5 billion

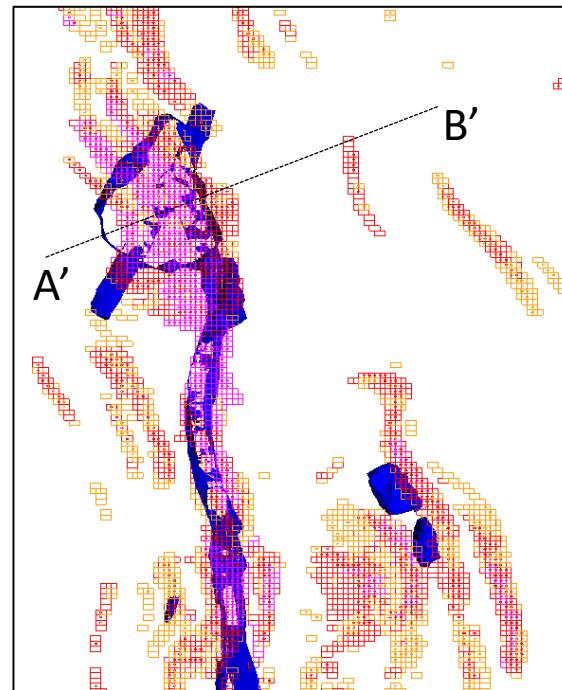

3D MODELLING IMPROVING MINE PLANNING & TARGETING

- Technological advances have allowed all historic data sets, including geological structure, lithology and alteration, to be incorporated into 3D modeling software to assist in understanding of the Plutonic orebody
- 3D Models are better predicting the volume and grade of gold and where it exists in space
- 3D Models are being incorporated into Mineral Resource block models → ~12 month process

Plan View

UNTAPPED EXPLORATION POTENTIAL AT MAIN PIT

Historical drilling highlights exploration potential towards northeast

- Only minimal and shallow drilling towards northeast of Main Pit
- Historical drilling focused solely on oxide component with minimal drilling below 40 metres
- Further expansion of resources could warrant trade-off studies to determine possible relocation of mill facilities and tailings for a larger push-back
- Pit optimization underway to complete Full Potential Assessment on Main Open Pit

POTENTIAL ORE SOURCES FOR THE SECOND MILL

Plutonic Main Pit Pushback Project

- High grade, brownfield gold project located in one of the top mining jurisdictions
- Low capital intensity and short construction period of only one year
- All necessary infrastructure already in place
- Flowsheet utilizes conventional open pit mining techniques
- Past producing open pit operation simplifies permitting process

Plutonic-Marymia Gold Belt Consolidation

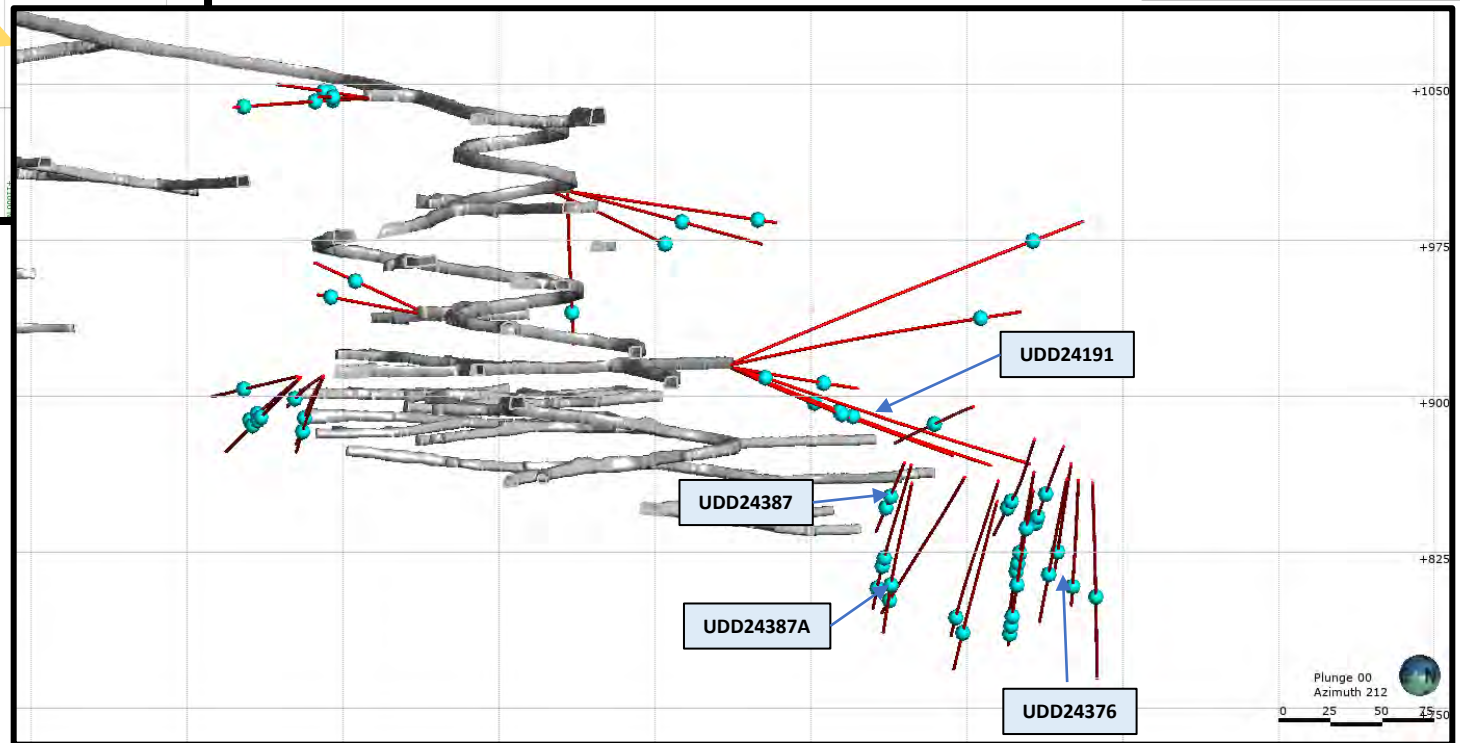

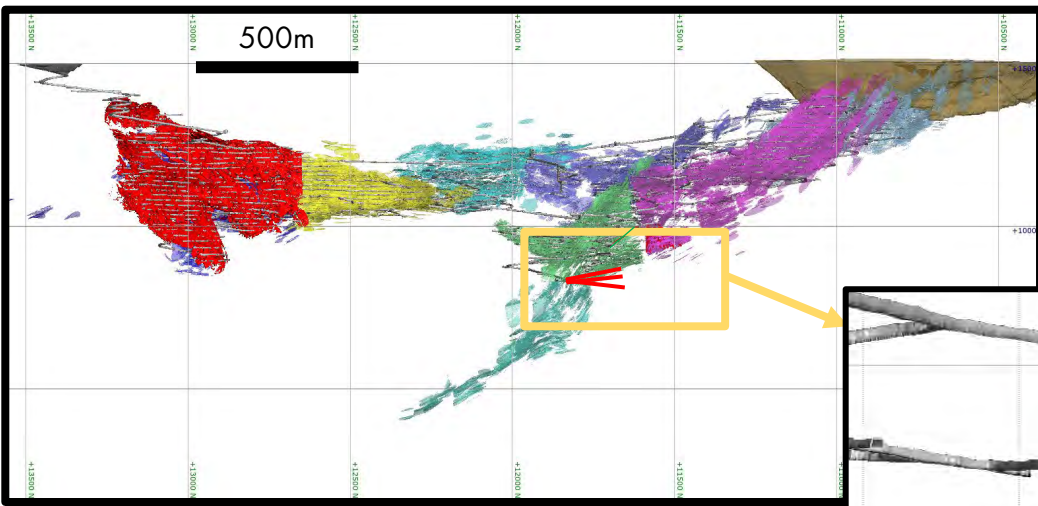

- Neighbouring exploration/ development projects lack milling infrastructure
- Opportunities for Joint-Ventures, Farm-In Agreements and Acquisitions
- Opportunity to truck ore from >100 km radius

BALTIC WESTERN EXTENSION

LEGEND

- Mineralized Intersections
- Non-mineralized Intersections
- Resource outline

BALTIC WEST EXTENSION

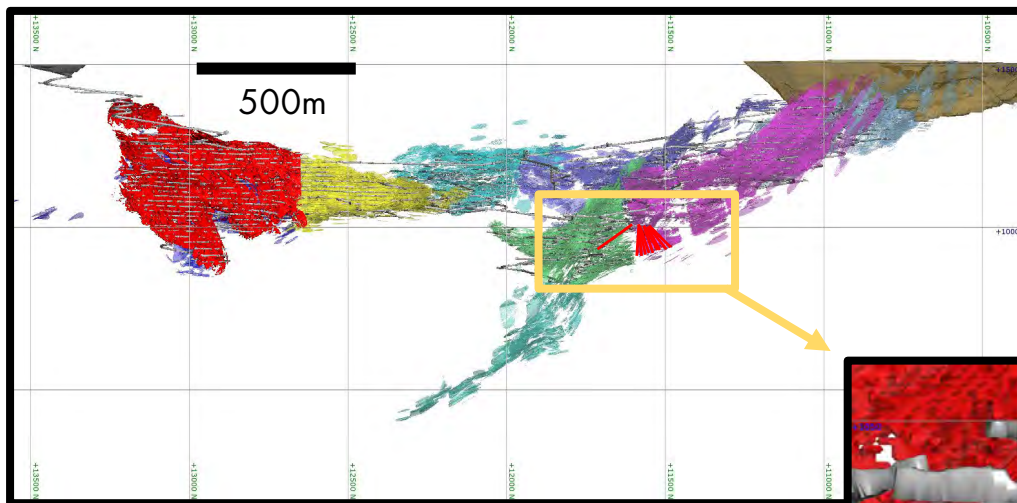

Q2 2021 results include:

- 17.7 g Au/t over 6.4 metres (UDD24376)
- 17.5 g Au/t over 4.1 metres (UDD24387A)
- 10.1 g Au/t over 4.0 metres (UDD24191)
- 34.7 g Au/t over 1.0 metre (UDD24387)

Note: For details, please refer to the press release dated August 17, 2021 available on the Company's website and sedar.com.

INDIAN WESTERN EXTENSION

INDIAN ZONE

Q2 2020 results include:

- 56.3g/t over 15.1m (UDD22011)
- 10.2g/t over 7.1m (UDD22013)
- 11.9g/t over 5.3m (UDD22003)

LEGEND

- Mineralized Intersections
 - Non-mineralized Intersections
 - Resource outline
- View looking East

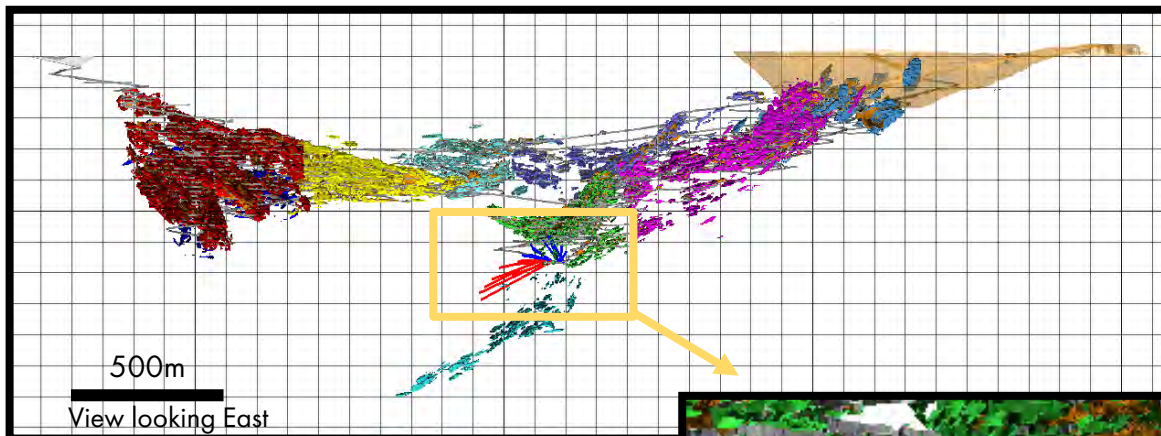

Note: For details, please refer to the press release dated June 17, 2020 available on the Company's website and sedar.com.

EXTENSION INTO BALTIC GAP

BALTIC GAP AND BALTIC EXTENSION ZONE

Q2 2020 and Q1 2021 results include:

- 40.4 g Au/t over 6.50 metres (UDD22310)
- 12.4 g Au/t over 4.10 metres (UDD22309)
- 21.8 g/t gold over 8.3 metres and 13.4 g/t gold over 5.0 metres (UDD23880)
- 20.7 g/t gold over 2.1 metres (UDD23820)

Q2 2021 results include:

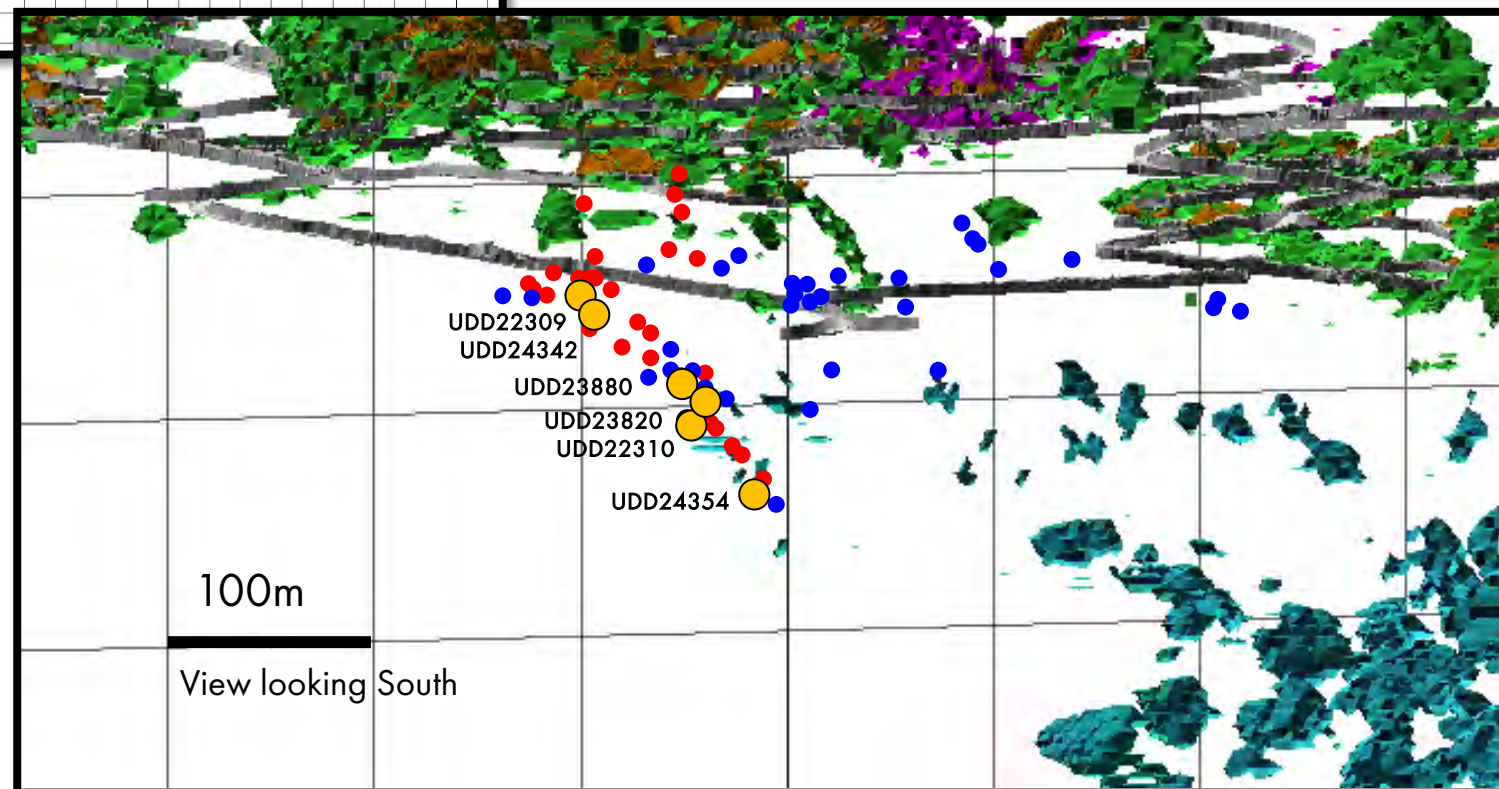

- 14.8 g/t gold over 13.4 metres (UDD24342)
- 4.5 g/t gold over 5.5 metres (UDD24354)

Q3 2021 results include:

- 17.7 g/t gold over 6.4 metres (UDD24376)

LEGEND

- 2020 Intersections
- 2021 Intersections

Note: For details, please refer to the press releases dated June 24, 2020, March 29, 2021 and August 17, 2021 available on the Company's website and sedar.com.

PLUTONIC MAIN PIT PUSH-BACK

Plan view – Push-Back relative to existing infrastructure at Plutonic Gold Operations

MAIN PIT PUSH-BACK – ROBUST PROJECT ECONOMICS

Long term supply of open pit feed to supplement underground mill feed at Plutonic

- Main Pit Push-Back unlocks significant value sitting within the Plutonic Gold Operations
- High grade, brownfield gold project located in top mining jurisdiction
- After-tax NPV of \$120M and IRR of 35%
- Average annual open pit production of 60,000 ounces to supplement underground production

ECONOMICS		PRE-TAX	POST-TAX
Net present value (NPV 5%)	A\$M	177	120
Net present value (NPV 5%)	\$M	124	84
Internal rate of return (IRR)	%	45	35
Payback (undiscounted)	Years	2.5	2.6
LOM avg. annual cash flow after capital	A\$M	55.1	43.0
Total cash flow (undiscounted)	A\$M	242	169

FORECASTS		
Gold price assumption	\$/oz	1,505
A\$ to US\$ assumption	A\$/US\$	0.70

PRODUCTION		
Average annual gold production	oz/year	60,000
Total LOM recovered gold	Oz	357,000
Mine life	Years	6
Average annual mining rate	MT/year	11.6
Strip ratio	waste:ore	10.3
Average mill grade	g/t Au	2.1
Average recoveries	%	86.4

MINIMAL INITIAL CAPEX WITH ATTRACTIVE COST STRUCTURE

High grade open pit ounces to lower cost profile of overall operation

- Low capital intensity and short construction period of only one year
- All necessary infrastructure already in place
- Flowsheet utilizes conventional open pit mining techniques
- Attractive unit costs with LOM AISC of \$863/oz → Materially lowering the cost profile of Plutonic Gold Operations
- Past producing open pit operation simplifies permitting process

CAPITAL EXPENDITURES

Initial capital costs (net of pre-production revenue)	A\$M	82.5
LOM sustaining capital costs	A\$M	5.6

COSTS

Mining cost	A\$/tonne mined	3.89
Processing cost	A\$/tonne milled	19.38
G&A cost	A\$/tonne milled	4.15
Total cash cost ¹	\$/oz	852
AISC ¹	\$/oz	863

MAIN PIT PFS OPPORTUNITIES

Enhancement studies being contemplated

- Investigate potential removal of pit size constraints
 - Infill drilling to upgrade Inferred resources
 - On-strike step-out drilling to expand resource
- Investigate targets along trend
 - Geotechnical drilling → confirm opportunity to steepen pit walls
 - Further optimize mining strategy resulting in operating cost savings
- Further optimize mine designs and scheduling resulting in fully utilized contractor fleet
 - Investigate interaction with underground operations → optimization opportunities at overall operation
 - Utilize Australian tax losses of A\$36 million

INFORMATION REGARDING SCIENTIFIC AND TECHNICAL INFORMATION

- The scientific and technical information included in this document has been reviewed and approved by Etienne Du Plessis, a “qualified person” within the meaning of NI 43-101. Mr. Du Plessis is not independent of the Corporation within the meaning of NI 43-101.
- The scientific and technical information in this document regarding the Plutonic Gold Operations has been summarized from the Corporation’s most recently filed technical report (Technical Report).
- The scientific and technical information included in this document regarding the Plutonic Gold Operations has been summarized from the Technical Report and is qualified in its entirety with reference to the full text of the Technical Report and is subject to all the assumptions, conditions and qualifications set forth therein.
- See the Technical Report filed on the Corporation’s profile at www.sedar.com, for details regarding the data verification undertaken with respect to the scientific and technical information included in this document regarding the Plutonic Gold Operations, for additional details regarding the related exploration information, including interpretations, the QA/QC employed, sample, analytical and testing results and for additional details regarding the Mineral Resource and Mineral Reserve estimates disclosed herein.
- There is no assurance that Mineral Resources will be converted into Mineral Reserves and Mineral Resources that are not Mineral Reserves do not have demonstrated economic viability.
- Due to the uncertainty that may be attached to Inferred Mineral Resource estimates, it cannot be assumed that all or any part of an Inferred Mineral Resource estimate will be upgraded to an Indicated or Measured Mineral Resource estimate as a result of continued exploration. Confidence in an Inferred Mineral Resource estimate is insufficient to allow meaningful application of the technical and economic parameters to enable an evaluation of economic viability sufficient for public disclosure, except in certain limited circumstances set out in NI 43-101.

Notes to Mineral Resource Estimate

- | | |
|---|---|
| <ol style="list-style-type: none"> 1. Mineral Resources are quoted inclusive and not additional to those Mineral Resources converted to Mineral Reserves. 2. The reporting standard adopted for the reporting of the Mineral Resource estimate uses the terminology, definitions and guidelines given in the CIM Standards on Mineral Resources and Mineral Reserves as required by NI 43-101. 3. Mineral Resources are not Mineral Reserves and do not have demonstrated economic viability. All figures are rounded to reflect the relative accuracy of the estimate and have been used to derive subtotals, totals and weighted averages. 4. Mineral Resources are estimated at a cut-off grade of 1.50 g/t Au for the Plutonic underground gold mine. | <ol style="list-style-type: none"> 5. Plutonic Underground Resources based on Deswik Mining Stope Optimizations using generalized Reserve MSO input parameters and/ or restricted ‘grade shell’ reported Resources. Plutonic Main Pit Resources based on pit optimization parameters derived by the PEA. 6. Plutonic Open Pit Mineral Resources are estimated at a cut-off grade of 0.40 g/t Au. 7. Mineral Resources are estimated using an average gold price of \$2,150 per troy ounce (~US\$1,505 per ounce). 8. Rounding errors exist in this table and numbers may not add correctly. |
|---|---|

Notes to Mineral Reserve Estimate

- | | |
|---|---|
| <ol style="list-style-type: none"> 1. The Mineral Reserve Estimate has an effective date of December 31, 2019. 2. The CIM Definition Standards were followed for Mineral Reserves. 3. Mineral Reserves for open pit are estimated at a cut-off grade of 0.40 g/t Au. 4. Mineral Reserves for underground are estimated at a cut-off grade of 2.00 to 3.00 g/t Au. | <ol style="list-style-type: none"> 5. Mineral Reserve economics are estimated using an average long term gold price of \$1,348 per ounce. 6. Dilution of 15% was factored into the estimation of underground Mineral Reserves. 7. All figures are rounded and use significant figures. Subtotals, totals and weighted averages are calculated from quantities before rounding and significant figures. |
