Two Questions For New Operations

Grade Reconciliation?

- Ore is where it is expected and at expected grades
- The Reserve Block Model is in excellent agreement with the Blasthole Model
 - All production blast holes are sampled
 - A cross-belt sampler/weightometer system is used to monitor ore delivered to the leach pad

Recovery Reconciliation?

- Metallurgical recovery is reconciling well compared to our initial modeling and on-going met testing
- A full metallurgical balance is completed monthly: recoverable ozs to the heap leach pad, gold in inventory within the gold recovery plant and inventory in stockpiles
- Actual recovery vs forecast recovery is reconciled quarterly

A Disappointing Year

How Do We Get Our Groove Back?

- Mining not an issue
- Leach pad not an issue
- ADR not an issue
- Increase crushing/stacking system availability and utilization
 - Stack year round
 - Be disciplined about preventive maintenance
 - Advanced training of operators and maintenance personnel
 - Reduce turnover – improved salaries and benefits
 - Adjust spares and parts inventory
